

Experience

Vancouver Fashion Week | *Web Developer Intern* | Aug 2025 – Nov 2025

Wix CMS, SQL, PHP, Adobe Creative Cloud, GitHub, Premiere Pro, Google Suite, CapCut

- Modernized and maintained three high-traffic web properties (VFW, VKFW, GFC) using Wix CMS and internal databases to ensure 100% content accuracy and improved cross-device usability.
- Engineered digital asset pipelines and managed live LED display systems during Fashion Week shows to execute seamless visual content delivery for international runway shows.
- Produced and optimized short-form video highlights for social platforms, increasing digital engagement by 150% and increasing event visibility across TikTok and Instagram.

Independent Web Developer | *Freelance* | Jan 2025 – Present

JavaScript, Electron, Vite, Node.js, CSS3, SQL

- Architected and deployed **bespoke** desktop applications, including *Balance*, a personal finance tool featuring custom-tailored data visualization and secure local storage.
- Engineered cross-platform interfaces using **Electron**, **Node.js** and **Vite**, ensuring low-latency user experiences and native-level desktop integration. Focused on ensuring the local storage, data visualization, and performance aspects were well engineered.
- Managed the full software development lifecycle (SDLC) for diverse clients, translating ambiguous business requirements into production-ready technical specifications. Designed custom LLM workflows to accelerate the SDLC and automate redundant engineering tasks.

BCIT New Media Design & Emily Carr UX Hackathon | *Award Winner (1st Place)* | June 2025

Figma, Generative AI Workflows, UX Research, Prototyping

- Leveraged **AI-native workflows** to accelerate asset creation and iterative prototyping, delivering a high-fidelity interactive mockup for Invest Together, a gamified fintech platform targeted at young adult investors, within a strict 8-hour sprint with the result of winning 1st place.
- Executed an intensive, 24-month technical program at **BCIT** (New Media Design & Web Development), maintaining high-performance standards across a rigorous 10-course-per-semester workload focused on full-stack development and human-centered design.
- Developed and deployed a diverse portfolio of applications using **JavaScript (ES6+)**, **React/React Native**, and **Vue.js**, while integrating server-side technologies including **Node.js**, **Express**, and **SQL** to manage custom API creation and CRUD operations.

FSGV (Family Services of Greater Vancouver) | *Senior Youth Worker* | May 2021 – May 2025

Enterprise Software (ETO/EBSCO), Stakeholder Management, Project Management

- Architected individualized action plans and skill-building modules by applying user-centered design frameworks and project management principles to achieve measurable development goals for high-priority clients.
- Facilitated cross-functional collaboration between multidisciplinary teams and government ministries to translate complex regulatory requirements into clear, actionable service plans and roadmaps.
- Managed sensitive data architecture and compliance reporting for the Ministry of Child and Family Development, ensuring 100% audit accuracy and streamlined cross-team communication.

EDUCATION

BCIT | *Diploma in New Media Design and Web Development* | Dec 2025

Trinity Western University | *Bachelor of Arts* | Apr 2023

Technical Skills

JavaScript (ES6+), HTML5, CSS3, SQL, PHP, React.js, React Native, Electron, Vue.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Figma, Git/GitHub, Adobe Creative Cloud (Photoshop, Illustrator, Premiere Pro, After Effects), Powershell, Bash, Linux/Unix, Docker, CI/CD, Testing (unit/integration/AB/load), GitHub Actions Workflows (including for deployment), AI Development Power-Tools (Claude Code, Cursor, etc. including custom LLM workflows)
